***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 31, 2007 has been entered.

***Election/Restrictions***

Claims 5, 14-16, 18, 19, 21-23, 25, 26, 29-44, 50, 54, and 58-62 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on December 2004 where Group I (device) and Species E (Figure 3D) were selected for prosecution.

Elected Species E (Figure 3D) does not contain a netting of a "fabric made from threads or wires knotted, twisted, or woven to form a regular pattern with spaces between the threads" (MSN Encarta online dictionary). Furthermore, the term "netting" does not have a special definition and is not used in the specification. Therefore, it is not clear that the present claims fall within the scope of the elected species Figure 3D that does not provide a netting as conventionally defined.

**Therefore, the Examiner will interpret the language "netting" broader than this ordinary definition and request that the term "netting" be deleted or replaced with a supported term that encompasses the structure of elected Figure 3D.**

No support for the claim amendments was pointed out in the response filed October 31, 2007 even though it was required by the fourth paragraph in the "Conclusions" section in the March 12, 2007 Office action. Failure to point out support for any amendments may result in any future response being held non-responsive.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 6-8, 10, 12, 13, 17, 20, 27, 28, and 63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The new term "string-like" is indefinite and renders the claim scope unclear because it is equivalent to "or the like"; see MPEP 2173.05 (b) F that is incorporated herein by reference.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4, 6, 7, 8, 10, 12, 13, 17, 20, 27, 28, and 63 are rejected under 35

U.S.C. 102(e) as anticipated by Streeter (US 2006/0247492) or, in the alternative, under 35 U.S.C. 103(a) as obvious over Streeter (US 2006/0247492) in view of Wright et al (US 5,306,296). Streeter anticipates the claim language where Figures 9 and 10 show rings with restraining members extending across the middle thereof; see also paragraphs [0029] to [0031]. Marks appear on Figure 9 on the top and bottom sides of that figure.

Alternatively, one may not consider the marks of Streeter as actual marks or merely an unintended feature of the drawing. However, Wright teaches that it was known to put marks on similar rings as a means of aiding insertion and orientation thereof during implantation; see column 4, lines 29-35 and column 14, lines 40-43. Therefore, it is the Examiner's position that it would have been obvious to put marks on the ring of Streeter for the same reasons that Wright teaches doing the same.

With regard to claim 3, the Applicant is directed to paragraph [0025].

With regard to claim 8, rigidity is a matter of degree and Streeter's ring (Figure 10) is considered rigid to the extent required by the present claim.

With regard to claim 28, Figure 10 looks D shaped such that the claim language is considered fully met.

***Response to Arguments***

Applicant's arguments with respect to the rejections have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Applicant should specifically point out the support for any amendments made to the disclosure, including the claims (MPEP 714.02 and 2163.06). Due to the procedure outlined in MPEP 2163.06 for interpreting claims, it is noted that other art may be applicable under 35 USC 102 or 35 USC 103(a) once the aforementioned issue(s) is/are addressed.

Applicant is respectfully requested to provide a list of all copending applications that set forth similar subject matter to the present claims. A copy of such copending claims is respectfully requested in response to this Office action if the application is not stored in image format (i.e. the IFW system) or published.
